Projects

E-Pharmacy

I recently worked on college project called "E-Pharmacy" similar to Amazon or any e-commerce website

- The main objective of the project is to deliver medicine, sanitizers, masks and many more in covid-19 pandemic situation where user can't go outside and buy all these things
- User can Login in ,order medicine, book appointment at doorstep ,book appointment at nearest hospital, upload prescription and order medicine, and Logout
- Admin Panel:admin can control all the orders, Bookings from the admin panel
- Crimes from 2001-2014(Data Science Project)
 - It's a Exploratory Data Analysis where crimes happened between 2001 to 2014 (Rapes, Murders, Dowry Deaths and many More)
- (Machine learning and Data analysis):-

Customer Purchase Analysis At Mall

- It's a analysis between Age ,Annual income, and how the person Spend the money while purchasing in Mall
- Is there any relationship between age and spending the money
- Is there any relationship between gender who spend the money most
- Using "k-Means clustering" we can Predict that in where we have to concentrate more
